Abstract of **JP2003168284**

PROBLEM TO BE SOLVED: To provide a method of saving user's trouble when editing a video to which a sub audio track is added.
SOLUTION: First data and second data are correlated and recorded. The second data are classified into a first class to by synchronized with a particular part of the first data and a second class not to be synchronized with a particular part of the first data, and the classified data are recorded. That is, information showing a

(independent/dependent) relation of the sub audio track to a video track is prepared, and a treatment of the sub audio track in editing the video track is changed on the basis of the information.
